

Please do not let anything transpire to jeopardize the existence of independent ISP's. THe area where I live, Verizon advertises that DSL is available; however, I know several people who have subscribed and it is not adequate. Nothing about Verizon is good in the community of Comanche. Verizon has told us we are not worth spending the money on to upgrade our phone service. They got mad at the City of Comanche several years ago and are retaliating. Let this remain a free country--let us make our own decisions about where and who we conduct out business with. Getting to be too many monopolies!!!
